

Body Burn

Three proven agents for weight loss, glucose balance and athletic performance. Stimulant-free (no ephedra or caffeine).

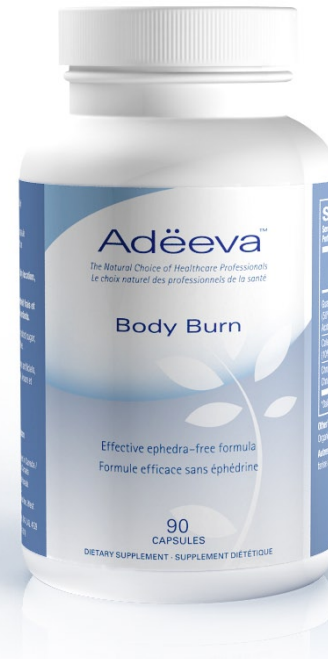

An effective supplement that helps individuals burn excess fat, gain lean mass, and overcome the genetic block to fat resistance. Body Burn is Ephedra-free and contains no central nervous system stimulants, making it a safe alternative to other fat burners.

More specifically, chromium is known to increase sensitivity of insulin receptors to insulin, helping to reduce insulin requirements after meals. This, in turn, improves blood sugar regulation and decreases the conversion of carbohydrates into fat, which helps solve a major problem for overweight individuals, who typically exhibit insulin resistance. In conjunction with exercise chromium also enhances lean mass gains (elevated resting metabolism and improving body shape) by increasing uptake of amino acids from the bloodstream via insulin receptors on muscle tissue.

Hydroxycitric acid, has been shown to block key liver enzymes that convert carbohydrates into fat, forcing higher amounts of glucose to be stored in the liver. This helps shut down appetite (natural appetite suppressant) and provides glycogen loading benefits for athletes.

Coleus Forskolin has been shown to promote the release of fat into the bloodstream from fat cells, enabling muscles to burn fat more efficiently during physical activity. Some overweight individuals exhibit a resistance to fat burning, as the fat remains locked in fat cells, even when they exercise. This ingredient helps burn fat, shrinking fat cells and overcoming this genetic blockade that frustrates many well intended over weight exercise participants.

Body Burn is the perfect supplement to complement diet and exercise recommendations for over weigh individuals, Type 2 diabetics, individuals with metabolic syndrome (pre-diabetics) and athletes. This product can be taken by insulin dependent diabetics, but these cases require blood sugar monitoring as this supplement is likely to produce a requirement for a lower dosage of insulin.

Clinical Applications:

Weight Reduction and fat loss

Non insulin-dependent diabetes (glucose intolerance, metabolic syndrome)

Insulin-dependent diabetes (insulin requirement may change and requires physician monitoring)

Sports enhancement for lean mass gains and glycogen loading

Active Ingredients

Guarcinia Cambogia (50% Hydroxycitric Acid)	2,000 mg
Coleus Forskolin (10% extract)	200 mg
Chromium (chromium hvp/hap chelate)	200 mcg

Amounts for 3 capsules, 90 per bottle

Contraindications & Considerations

Conditions:

- Pregnancy
- Breast Feeding or Lactation
- Kidney Failure (Renal Failure)¹
- Received a transplant of any kind¹
- Diabetic taking insulin¹
- If kidney has been removed¹
- Kidney clearance problem (e.g., a dialysis patient)¹

Medication/Apparatus:

- Insulin¹
- Digitalis¹

¹Requires approval from specialist/physician
